Requester's Full Name: THU HA NGUYEN Examiner #: 77580 Date: 04/30/03
 Art Unit: 2155 Phone Number 305-2447 Serial Number: 09/534,592
 Mail Box and Bldg/Room Location: CPK2-5A68 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.

 Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Method to eliminate bookmarking false servers

Inventors (please provide full names): Dutta, Rabindranath

Earliest Priority Filing Date: 03/27/2000

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

See attachment please!

A central load distribution server redirects requests for files to contents servers holding identical content by determining capacity utilization of those contents servers. Clients are prevented from directly accessing contents servers without first being redirected from central load distribution server. If clients directs access to contents servers then the client is redirected to a page containing notice of error. For browsers in which bookmark lists may be edited by user, facilities are provided for correcting the bookmark entry that brought the use to protected content server rather than to central load distribution server. This prevent any of content server being overwhelmed with traffic is likewise reduced.

STAFF USE ONLY
